Search PubMed for process evaluations if you are unable to identify a systematic review, or if your option relates to:</p> <ul style="list-style-type: none"> • a clinical program or service, or a drug • a public health program or service <p>2. Search Health Systems Evidence for systematic reviews addressing other questions (reviews of process evaluations) if your option relates to:</p> <ul style="list-style-type: none"> • a health system arrangement • an implementation strategy | <p>Provide a description of what you did, what you found and when you did it below, and provide the details of the searches you conducted in each database for systematic reviews of process evaluations to determine what local adaptations might be made, and whether they might alter benefits, harms and costs, using the tables below.</p> <p><u>What you did</u> How many searches did you conduct in each database?</p> <ul style="list-style-type: none"> • PubMed • Health Systems Evidence <p><u>What you found</u> How many relevant citations did you identify through your searches of each database?</p> <ul style="list-style-type: none"> • PubMed • Health Systems Evidence <p><u>When you did it</u> Date searches were conducted:</p> |

Search for systematic reviews of qualitative studies (acceptability studies) to determine which stakeholders' views and experiences might influence the acceptability of your option and its benefits, harms and costs.

As a reminder:

1. Search **PubMed** for qualitative studies (acceptability studies) if you are unable to identify a systematic review, or if your option relates to:
 - a clinical program or service, or a drug, or a public health program or service
2. Search **Health Systems Evidence** for systematic reviews addressing other questions (reviews of qualitative acceptability studies) if your option relates to:
 - a health system arrangement
 - an implementation strategy

Provide a description of what you did, what you found and when you did it below, and provide the details of the searches you conducted in each database for systematic reviews of acceptability studies to determine which stakeholders' views and experiences might influence the acceptability of your option and its benefits, harms and costs, using the tables below.

What you did

How many searches did you conduct in each database?

- PubMed
- Health Systems Evidence

What you found

How many relevant citations did you identify through your searches of each database?

- PubMed
- Health Systems Evidence

When you did it

Date searches were conducted:
