

Patient-Oriented Research Training and Learning – Primary Health Care

The PORTL-PhC Training Program

Purpose of Program: Free online training program to build capacity among Patients, Clinicians, Policy Makers, and Researchers in the conduct and use of patient-oriented primary health care research.

By engaging in this training program, participants will:

- Develop an understanding of the major topics and issues experienced by patients in primary health care
- Gain knowledge of approaches to identifying patient priorities in primary health care
- Understand methods of how to engage and be engaged in research, and how to listen to patient voices
- Develop appropriate skills for engagement in patient-oriented research
- Actively apply patient-oriented research skills and knowledge in the learner's own context

Program Overview:

1A. Patient Priorities and Patient Engagement in Primary Health Care

- **Objective:** To develop an understanding of the experiences of primary health care patients

1B. How to Identify Patient Priorities for Primary Health Care Research

- **Objective:** To gain knowledge of approaches to identifying patient priorities for research in primary health care

2. Methods and Examples of Patient Engagement in Primary Health Care Research

- **Objective:** To understand methods of how to engage and be engaged in patient-oriented research, and how to listen to patient voices

3. Skills Development in Patient Engagement and Patient-Oriented Research

- **Objective:** To develop knowledge and skills in conducting / participating in / or using patient-oriented research, and an outlook that supports effective patient engagement

4. Applying Patient-Oriented Research in the Learner's Own Context

- **Objective:** To actively apply patient-oriented research skills and knowledge in the learners' own context

Cost of Program: Free

Time Commitment: 1 hour / module (estimated) *A Certificate of Completion will be provided at end.

Program Format: Self-directed online learning. You will receive a password for the site and can log-in to participate in the training program at your own pace 24/7 – take as long or fast to complete as you wish!

Contact: To get started today or for more information please contact the PORTL-PhC Program Coordinator Rob Van Hoorn at rvanhoo@uwo.ca

This work was supported by the Ontario SPOR SUPPORT Unit (OSSU), part of the Strategy for Patient Oriented Research which receives support from the Canadian Institutes of Health Research (CIHR) and the Government of Ontario.
